

fairbanks

the fuel management specialists

intelligent fuel management

For over 20 years, Fairbanks has been providing superior fuel management services and forecourt services to the downstream fuel market. We use the power of real-time data to reduce fuel losses, lower operational costs and improve margins for fuel retailers. With customers in 35 countries and serving over 13,000 fuel stations, Fairbanks has over 200 employees with a global network of licensees providing a flexible, 24/7 service for independent retailers, hypermarket chains and multi-national companies.

why Fairbanks?

- 1 20 years' experience in the global 'downstream' fuel industry and a market leader in providing innovative, cost-effective solutions.
- 2 Services are customised and scalable to meet the specific needs of individual customers.
- 3 Fairbanks easily interfaces with a wide range of forecourt equipment to provide a consistent solution, regardless of the Automatic Tank Gauge (ATG) or Point of Sale (POS).
- 4 The 24/7 service is accessible via a secure web portal to ensure that customers receive live updates as required.
- 5 Fairbanks SIR service is certified to comply with US EPA/530/UST-90/007 leak detection of 9 litres per hour.

Fairbanks in numbers

20 years of service

50,000 + tanks protected

13,000 sites on contract

50 billion + litres analysed each year

1.5 million + deliveries verified per year

100 + dedicated analysts

35 countries

6 international licensees

how the service works

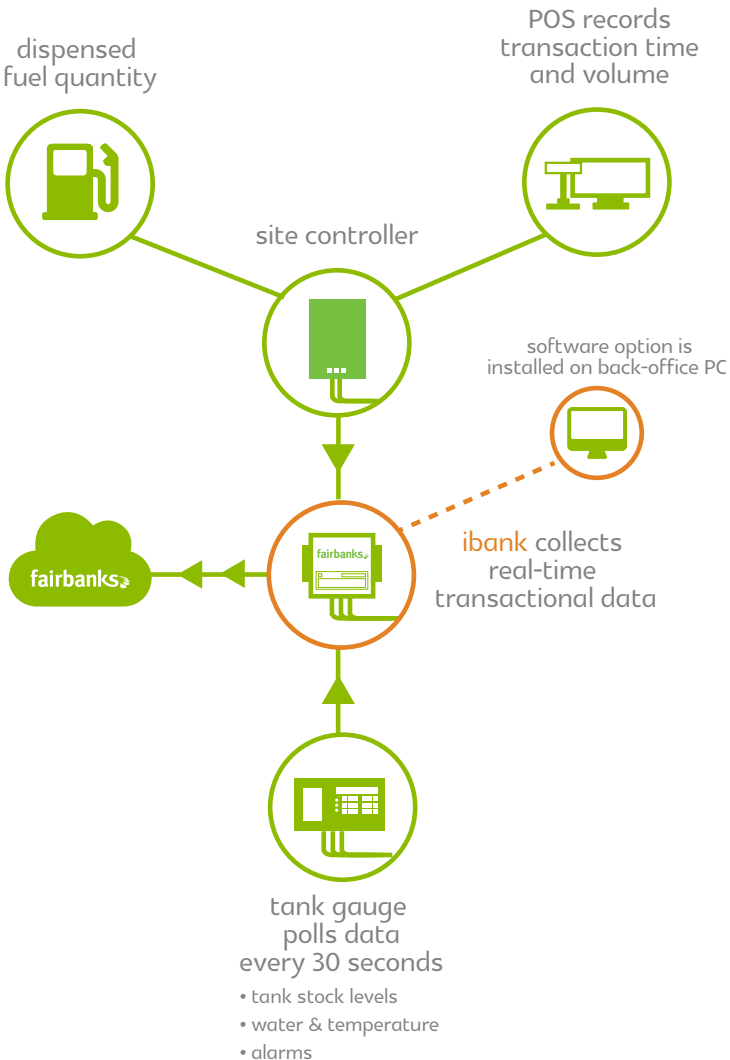

data collection

- stock levels
- transactions
- deliveries
- fuel prices
- alarms
- temperature
- water

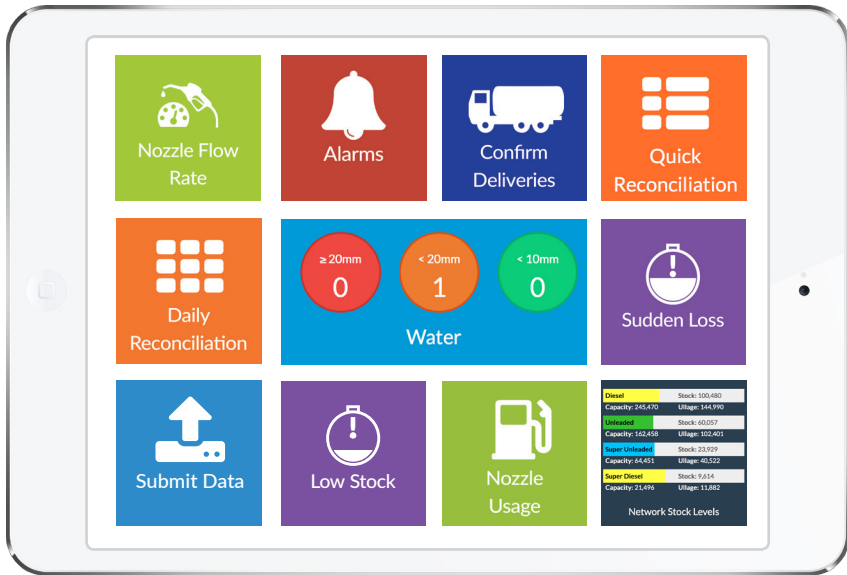

ibank

- ibank collects, processes and relays inventory data in real-time to the Fairbanks cloud.
- ibank comes as software, hosted on your back-office PC or as a smart data module linked to your ATG & POS.
- Customers access the Fairbanks cloud to review reports and display alarms.

greater visibility over your business

wide range of intelligent, customisable tools

compatible with any mobile, tablet, laptop or desktop

access data on the move

secure account for every user

real-time data, at your fingertips

We've developed a wide range of practical tools to make fuel management easier, giving you complete visibility and control. Tiles are fully customisable to offer different levels of functionality and can be controlled through the creation of individual user profiles, depending on the user's role and responsibilities.

Network Stock Levels

Quickly view stock levels across the network in real-time.

Low Stock

Observe tank stock levels and order new stock in good time.

Daily Reconciliation

Gain instant access to a detailed reconciliation by tank, grade or site.

Nozzle Flow Rate

Be alerted to flow rates that could affect the customer experience.

Water

Monitor real-time water alarms and react instantly to sudden water ingress.

Confirm Deliveries

Easily verify fuel delivery quantities and track consignment records.

Sudden Loss

React to potential tank leaks and ensure that any fuel losses are minimised.

Alarms

Ensure that important tank gauge alerts don't go ignored.

Nozzle Usage

Track which nozzles are out of action and view their daily usage.

Submit Data

Submit data, by day or by tank, for sites in your network.

Quick Reconciliation

Access customer-specific fuel reconciliation data with ease.

Feedback

Share your thoughts on Station Manager 365 using the Feedback tile.
